ON-DEMAND CLINICAL TRIAL LABEL CREATION, PRINTABLE ANYWHERE IN THE WORLD.

Your clinical trial needs labels, whether it's a lot of labels all at once or sporadically throughout the trial, that's where we come in. Network Partners labeling department works within your system to create labels needed for the clinical trial and have them available for print, anywhere, anytime.

HERE'S HOW IT WORKS

Choose from the system development items menu to enhance your current labeling capabilities, or select a turn-key solution and fully outsource the clinical trial label function.

SOFTWARE VALIDATION

- Turnkey validation system software using the V-Model (IQ/OQ/PQ or risk-based validation model.
- Comprehensive validation
- Execution and documentation for FMEA activities
- Creating test scripts
- Executing protocols
- Validation summary report

FORMAT MIGRATION

- Format migration formats from legacy to new system
- Migrate format one-to-one
- Migrate pdf and design on another format layer
- Re-create based on format attributes

CREATION ACTIVITIES

- User Requirement specification
- Risk documentation and suggested risk mitigation
- Written test scripts
- Traceability matrix linking user requirements to test scripts

DATA MIGRATION

- Migration of labels from legacy to new system
- Migrate formats
- Migrate master English text and country text (ML/CL) data and create new formats
- Recreate legacy labels in new system

Clients utilize our team of super users to handle the intricacies of the labeling system, allowing your team to concentrate on the trial. NPG's labeling experts work remote within any labeling system, creating clinical trial labels on-demand. Once the labels are approved, they're available to print at the point of use – any manufacturing location, any CMO.
